

WORLD SNOW DAY 2017

Date: 14.1. – 15.1.2016

Place: Pustevny (Beskydy, CZE)

International celebrations Snow World Snow Day 2017 was organized for the second time on the Pustevny within the event "Ice sculptures Pustevny 2017". SnowKidz Organizers have prepared Fun park for children full winter disciplines.

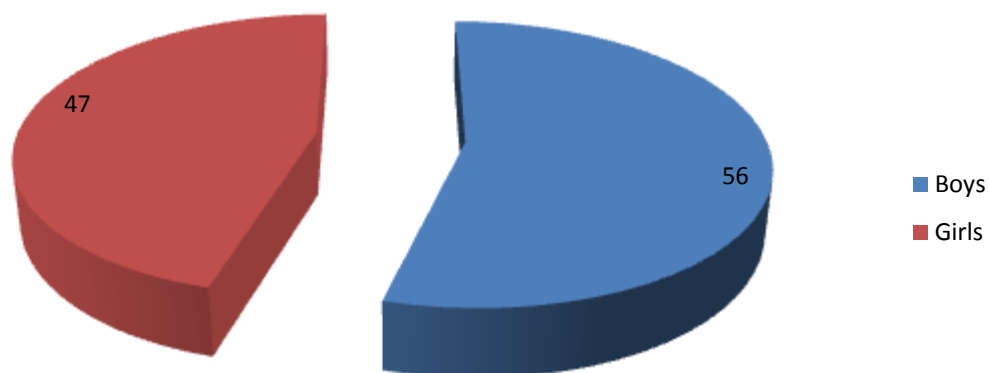

Children's fun park was built next to a tent with ice sculptures and so throughout were above-average attendance in the fun park. On Saturday, when was beautiful sunny weather in Pustevny, registered a lot of children in the fun park. Each of them could try four disciplines: skiing, cross-country, snow tubing and skiing for a couple. Direct in the children's fun park was available all the necessary material equipment free for children, including helmets. Experienced animators helped with the organization in the park, they counseled children and helped them. Quite surprising was the children's interest in cross country, it was a novelty for them, they like to try it, as well as parents of children appreciated the opportunity to try a new discipline for free. Conversely, as we expected, snowtubing experienced the greatest success, everyone wanted to try it, including parents. Skis for pair were very popular too, children try it with their parents and enjoyed a lot of fun. Absolutely everyone enjoyed a day full of good weather, movement, fun and relaxation.

On Sunday the weather was a little colder and it snowed most of the day. But that was not a problem for visitors in Pustevny, in the children's fun park were more children than previously day. Children could again ride on snowtubing, try skiing or cross-country or experience the fun on skis for the pair. In the children's fun park again helped the animators. Each of the children who visited the park and have tried at least one discipline, received gifts, e.g. a diploma, pennants, coloring books and candy. The rewards are great motivation for children.

During the celebration of International World Snow Day 2017, we welcomed more than 200 children in the children's fun park. It testifies to the increasing public interest in winter sports, which also contribute to good snow conditions. The fact we want to encourage, we want to send information to parents about the possibilities of regular sports on the contact information that parents have entrusted us with the registration. We want to achieve a greater awareness of parents about the possibilities of active leisure of free time even in winter.
